

High-Speed POS & Live Restaurant Command for Southern Spoon

Engineered for high-volume rush hours: Offline-first touch billing, station-routed KOT kitchen printing, automatic cash drawer kicks, real-time Google Sheets phone sync, and all-new dynamic inventory & portion control.

**⚡ 100% Offline-First
No Internet Dependency**

CORE OPERATING CAPABILITIES

Engineered for Reliability & Speed

Lightning Touch Billing & Table Orders

Dine-In, Takeaway, and Delivery workflows. Full interactive table sessions, quick tender cash calculators, split payments, and instant discount authorization.

Real-Time Google Sheets Cloud Sync

Every settled bill mirrors instantly to your private Google Sheet. View itemized portions, revenue sums, payment splits, and shifts live from your smartphone.

Direct ESC/POS Thermal Printing & Auto-Kick

Native support for 80mm & 58mm thermal receipt printers. Automatically triggers the 24V RJ11 cash drawer solenoid and auto-routes KOT slips to kitchen stations.

Shift Audits & Anti-Theft Governance

Mandatory morning float entry, mid-shift X-Reports, blind cash drawer closing declarations, automated over/short Z-Reports, and master supervisor PIN protection.

All-New Feature Spotlight: Live Inventory & Portion Size Management

NEWLY ADDED & FULLY INTEGRATED

Directly integrated into the POS admin header, the new **Inventory Center** empowers Southern Spoon managers to control prices, configure portion sizes, and expand the menu in real time without technical support.

Real-Time Price Modifier

Update base menu prices with quick steppers (-50, +50, +100) and instant audit logs with user/timestamp tracking.

Portion Sizing Engine

Configure Half / Full, Small / Regular / Large, or custom portion variants with individual price adjustments and live totals.

Universal Category Addition

Add new dishes across all categories (Rice, Kottu, Noodles, Devilled, Juices, Desserts, Cigarettes) with 86 stock-out toggles.

RUSH-HOUR OPERATIONAL FLOW

Seamless Order-to-Cash in Seconds
