

The Rock-Solid POS Built for **Speed, Zero Downtime & High Profits.**

Engineered specifically for busy Sri Lankan restaurants, cafes, and multi-station kitchens. Combining desktop-grade speed with local SQLite persistence and live Google Sheets cloud synchronization — guaranteeing non-stop operations even when your internet drops.

100% OFFLINE-FIRST UPTIME	< 0.1s INSTANT BILLING LATENCY	Dual RECEIPT & KITCHEN KOT	Live CLOUD GOOGLE SYNC
-------------------------------------	---	--------------------------------------	----------------------------------

Why Southern Spoon POS Outperforms Cloud-Only Systems Architectural Superiority

100% Zero-Latency Offline Independence

Unlike web-based POS software that stalls or crashes whenever Dialog, Mobitel, or SLT fiber experiences outages, Southern Spoon POS runs directly on your local Windows PC with SQLite local persistence. Orders are created, settled, and printed with instantaneous speed, zero loading spinners, and total privacy.

Live Cloud Mirroring (Owner Mobile Dashboard)

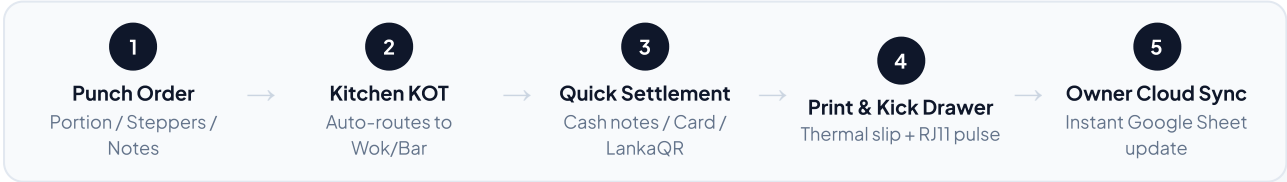

You get the reliability of local hardware PLUS the freedom of cloud monitoring. Every settled bill automatically syncs in real-time to your secure Google Sheet. Track live itemized portions, daily revenue, and payment breakdowns directly from your smartphone wherever you are in the world.

Direct ESC/POS Thermal Printing & Drawer Kick

Native raw ESC/POS integration for standard 80mm and 58mm thermal receipt printers. Automatically pulses the 24V RJ11 solenoid to pop open the cash drawer immediately upon cash settlement. Includes station-routed Kitchen Order Tickets (KOT) for direct chef dispatch.

Shift Audits & Anti-Theft Security

Prevent cashier revenue leaks with mid-shift X-Reports, blind cash drawer closing declarations, automated over/short calculation in end-of-day Z-Reports, and master PIN security on discounts, voids, drawer kicks, and menu price modifications.

Comprehensive Features & Modules

EVERY TOOL YOUR RESTAURANT STAFF AND MANAGEMENT NEED

FUNCTIONAL MATRIX

Edition: 2026 / 2027

The 6 Pillars of Operational Excellence

Built for Speed & Accuracy

1. Speed-Touch Order Terminal

- Portion Architecture:** Full and Half portion selection with automatic variant pricing.
- Fast Counter Steppers:** Instant +1, +2, +5 buttons for fast-moving items like Short Eats, Soft Drinks, and Cigarettes (Dunhill, Gold Leaf).
- Custom Kitchen Directives:** Preset modifiers (Extra Spicy, Less Chili, Sunny Egg on top) + freeform special request notes.
- Dynamic Search & Category Filters:** Instant search by Sinhala or English name; categorized tabs with intuitive iconography.

2. Hardware & Thermal Printing

- Thermal Receipt Engine:** Clean 80mm & 58mm layouts with restaurant header, hotline, VAT/tax details, and customer Wi-Fi credentials.
- Multi-Station KOT Dispatch:** Smartly categorizes and tags food tickets for Wok Station, Kottu Griddle, Beverage Bar, and Curry Counter.
- RJ11 Cash Drawer Auto-Kick:** Sends hardware solenoid trigger pulse (ESC p 0 25 250) on cash settlement.
- On-Screen Thermal Previewer:** Inspect receipt formatting and reprints directly in the UI before cutting paper.

3. Table & Dining Floor Engine

- 3-Zone Visual Layout:** Courtyard Garden, Main Dining Hall, and AC Lounge.
- Isolated Table Sessions:** Keep tabs open for dining parties, continuously add courses, and view running bill total and seated duration timer.
- Flexible Channels:** Instant toggle between *Dine-In*, *Takeaway*, and *Delivery* orders with zero confusion.
- Occupancy Status:** Real-time color indicators: Vacant (Emerald), Occupied (Amber), Billed (Cyan).

4. Sri Lankan Currency Cashier Desk

- One-Tap Tender Buttons:** +Rs. 5,000, +Rs. 2,000, +Rs. 1,000, +Rs. 500, +Rs. 100, and Exact Amount.
- Zero-Error Balance Calculation:** Displays change due in large high-contrast numerals to eliminate manual arithmetic errors.
- Multi-Payment Readiness:** Seamlessly split or switch between Cash, Visa/Mastercard (with terminal auth ref), and LankaQR.
- Discounts & Charges:** Configurable percentage/fixed bill discounts with service charge toggle.

5. Shift Balancing & Fiscal X/Z Reports

- Morning Opening Float:** Cashier registers starting cash float with timestamp verification.
- Mid-Shift X-Report:** Instant audit slip showing sales-to-moment without closing register.
- End-of-Day Z-Report:** Blind cash drawer declaration; POS compares physical count against expected cash and prints official Over/Short audit slips.
- Historical Shift Archive:** Complete record of past cashier registers and reconciliations.

6. Anti-Theft Security & Live Cloud Sync

- Master PIN Protection (9001):** Protects menu price changes, cash drawer manual open, voided orders, and shift closures.
- Price Audit Trail:** Logs old price, new price, date, and cashier identity on any price modification.
- Live Google Sheets Sync:** Automated background POST of itemized sales (Item name, portion, quantity, bill total, running cumulative sum).
- Excel / CSV Data Export:** One-click export for accountants and tax auditors.

System Compatibility & Requirements

Component	Supported Specifications	Status
Computer / POS Terminal	Windows 10, Windows 11 (64-bit). PC, Laptop, All-in-One Touch POS (Core i3/i5, 4GB+ RAM)	FULLY COMPATIBLE
Thermal Printers	Any standard ESC/POS USB or Serial Printer (80mm / 58mm). Epson, Xprinter, Rongta, Bixolon, Sunmi	NATIVE SUPPORT
Cash Drawers	Standard 12V / 24V RJ11 interface connected to thermal receipt printer	AUTO-KICK
Network & Internet	Operates 100% offline. Internet (Wi-Fi/LAN/Dongle) only needed for Google Sheets live syncing	OFFLINE-FIRST

Investment & Licensing Plans

SIMPLE, TRANSPARENT, AND HIGH-RETURN PRICING WITH ZERO HIDDEN FEES

OFFICIAL PRICING

Valid: 2026 / 2027

High Return on Investment (ROI)

By preventing kitchen billing omissions, stopping unauthorized cash drawer access, and speeding up table turnover during peak rush hours, this system typically saves mid-sized restaurants over **Rs. 25,000 – Rs. 50,000 per month** in recovered revenue.

Fast 3-Step Deployment & Handover

Zero Downtime Transition

Step 1: Setup & Menu Load

We install the desktop system on your POS PC, load your complete food & beverage menu with portion pricing, and configure your Google Sheets cloud sync.

Step 2: Hardware Pairing

We calibrate your 80mm/58mm thermal printers, test KOT kitchen dispatch, set up the cash drawer kick solenoid pulse, and verify custom receipt headers.

Step 3: Cashier Training

A quick 30-minute interactive cashier and manager training session covering speed billing, shift opening floats, discounts, and day-end Z-Report balancing.
